- Healthcare Across The Globe

Info About Bravo Pharma

Bravo Pharma has its corporate office in United Kingdom and subsidiaries in Estonia, Uzbekistan, Uganda, Dubai, India, USA and Sweden. Over the years it has been manufacturing pharmaceutical products and actively involved in their distribution and sales in India, Central Asia & Eastern European countries.

Year by year our activities have extended to different areas of healthcare. At present Bravo companies cover the whole value chain in healthcare, including applied research and product development, diagnostic services, treatment, global healthcare, production and sales.

Bravo Pharma has its own diagnostic laboratories and medical centres, pharmaceutical factories, pharmacies, mobile laboratories and telemedicine centres. Our applied research and product development projects are carried out in collaboration with universities, research centers and innovative SME-s. The network of leading hospitals worldwide is at the service of our patients.

Our Products

An integrated healthcare solutions provider with basket of pharmaceutical products, Bravo Pharma caters to over 45 therapeutic areas that include cardiovascular, gastrointestinal, analgesics, haematinics, anti-infectives and antibiotics, respiratory agents, antidiabetics and immunologicals.

Products Categories

- Analgesics/ Antipyretics(45)
- Antacids/H2 Beta Blockers(14)
- Anthelmentics(4)
- Anti Asthamitic(6)
- Anti Bacterial/Anti Biotics(8)
- Anti Cold/Anti Histamines(0)
- Anti Convulsant(0)
- Anti Cougulant(0)
- Anti Diabetic(0)
- Anti Diarroheals(0)

Our Products

BRAVO HIV-SELF-TEST

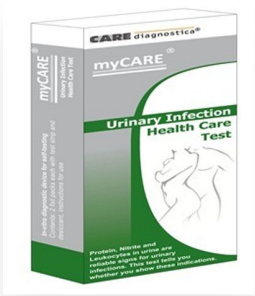
Bravo HIV-Self-Test detects both viral antibodies that immune system starts to produce when a person has been infected with HIV as well as HIV viral antigen. Bravo test in a unique self-test as it enables to detect HIV earlier than any other self-test available. Due to the detection of HIV viral antigen it shortens the "window-period" (the time from being infected to the time a test gives accurate result) from the average of 3 months to 2 weeks.

Bravo HIV-Self-Test has been worked out in close collaboration with doctors, scientists and laboratory specialists. The novel concept has been controlled on a target group consisting of persons from different age groups and different social background. The test has been made as simple as possible for self-use. The results of the test can be read with special phone app. According to the results of the test the app linked to it will give further guidelines in a clear and straightforward manner. It would enable the person who has taken the test to

Our Products

FERRI-Check®.

The test for detecting iron deficiency tells you if yourblood iron level is sufficient. If there is not enough iron inthe blood, the body developsanemia and may have aserious effect on your health and quality of life.The test is used to determine the ferritin (FER) from thewhole blood sampletaken from the fingertip. The test canbe used to identify possible iron deficiency.Ferritin is a protein and a primary form of iron that isstored in the cell. A positive result means that the level offerritin in the blood is lower than 20 ng / ml and the irondeficiency is likely



Urinary Tract Infection Test

Urinary tract infection test is a simple, fast and reliable home test that helps both women and men early to detect urinary tract inflammation, or bacterial infection. The test takes only 60seconds.

To perform the test, an early morning urine sample must be collected in the container. Place the test strip in a urine-filled container, remove the test strip from the container, and read the responses in 60seconds.

Our Products

Liver-screen test

Liver function Liver-screen is a convenient and accuratefinger test to detect primary liver damage and problems.The test can be done conveniently in your own home, andthere is no need to send any samples to the laboratory. You will get the result in 15 minutes. The accuracy of the test is89.2% compared to the laboratory method

INSTI® HIV Self Test.

INSTI® HIV Self Test is a single-use HIV test kit that allows you to get results in the comfort of your home and at a time that works best for you. Sample, pour and read your results immediately.

Benefits:

• The World's Fastest HIV Test: Get highly accurate results instantly.

• Convenient and Discreet: Get results from the privacy of your own home.

• Easy to Use: Simple design. No timers, no fuss.

• Early Detection: Detects HIV infection up to two weeks sooner than leading brands.

Our Products

Tik Alert

With TIK'ALERT test, it is possible to detect the presence of those specific antibodies, and thus, a recent infection with Borrelia bacterium between 2 and 4 weeks after the presumed tick bite. Should the case arise, an antibiotic therapy will eliminate the infection. The TIK'ALERT test is very accurate and is used by professionals in the field (hospitals, laboratories...). Evaluation reports show that early antibodies against Borrelia bacterium are detected in more than 91 % of the cases

INSTI® HIV Self Test.

INSTI® HIV Self Test is a single-use HIV test kit that allows you to get results in the comfort of your home and at a time that works best for you. Sample, pour and read your results immediately.

Benefits:

• The World's Fastest HIV Test: Get highly accurate results instantly.

• Convenient and Discreet: Get results from the privacy of your own home.

• Easy to Use: Simple design. No timers, no fuss.

• Early Detection: Detects HIV infection up to two weeks sooner than leading brands.

Our Products

Pregnancy Test

A quick and convenient test for "pregnancy hormone" - human chorionic gonadotrophin (hCG) in the urine. Sensitivity to human chorionic gonadotrophin (hCG): 25 mIU / ml. Accuracy over 99%. Result in 5 minutes

Mistral 1718 D4D Drug Detection Pen Test

The Pen Test is an ampoule-based technology that detects trace amounts of drugs as well as bulk amounts. Containing up to five tests per kit, these kits are inexpensive, easy-to-use and easy-to-handle. You can mix and match any test you might need. An optional, convenient carry pouch can be purchased for easy storage of individual pens.

Features:

Detects trace drug residues

Bulk drug detection and identification

Multi-use

Will not destroy evidence

D4D and Coca tests detect most drugs with two tests

Cannabis (Hashish, Marijuana, Hash Oil, THC, etc.), Heroin, PCP, LSD, Buprenorphine, Amphetamines

Our Products

Ovulation Test

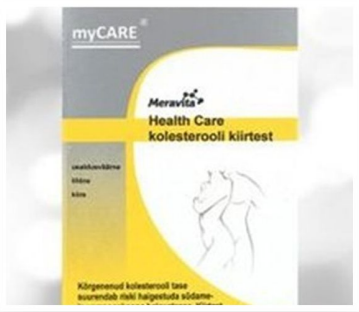
To accurately identify your fertile days use an ovulation test that detects the changes in your personal fertility hormones in urine. Ovulation tests are 2x more accurate than calendar method. Ovulation Test are over 99% accurate in detecting the LH surge to identify your most fertile days.

PROSTA-Check

PROSTA-Check® home rapid test determines whether prostate specific antigen (PSA) levels in your blood are normal or higher than average. PSA is a protein, which is only produced by the prostate, but part of it may enter the blood stream. This is how the blood test can assess the physiological condition of your prostate.

Results from PROSTA-Check® rapid test that are higher than normal (over 4 ng / ml), determines whether the prostate is benign or contains a malignant growth.

Our Products



Cholesterol Test

With this test it is possible to quickly and simply assess at home whether the total cholesterol level is within the normal range or not. Results in 3 minutes.

NutriSMART®

The NutriSMART® is quick and easy test which tests 57 more common foods and only needs a few drops of capillary (finger-prick or ear lobe derived) blood. Its innovative design ensures the blood sample and reagents are retained in the device so the test can be carried out almost anywhere making it a practical and hygienic addition to your service. No need for additional equipment as results can be read with the naked eye - everything you need is provided in the test kit!

Our Products

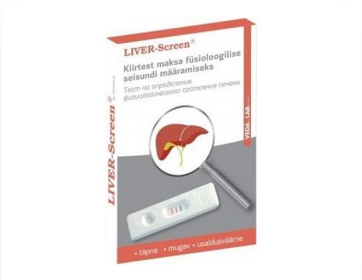
Menopause Test

The SELF Check Menopause Test detects the levels of Follicle-stimulating Hormone (FSH) in your body. FSH causes your ovaries to produce oestrogen, and when your ovaries slow down the production of oestrogen, the levels of FSH are increased.

Blood Sugar Test

With this test it is possible to quickly and simply assess whether the blood glucose level is within the normal range or not at home conditions. Results in 30 seconds.

Our Products



Liver-screen test

Liver function Liver-screen is a convenient and accurate finger test to detect primary liver damage and problems.The test can be done conveniently in your own home, and there is no need to send any samples to the laboratory. You will get the result in 15 minutes. The accuracy of the test is

Early Pregnancy Test

The Viola pregnancy test is twice as sensitive as other pregnancy tests. This test detects pregnancy already on day 8 after intercourse.

Our Products

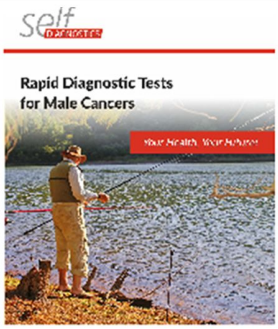
Testosterone self test

Testosterone is the most important male sex hormone.However, women also have testosterone in their bodies. With age, the body's production of testosterone decreases more often. According to a study, 20 - 40 % of men suffer from testosterone deficiency as of the age of 40 to 50. Apart from decreasing muscle power, hair loss and changes in libido, testosterone can have considerable impact on man's health.

Testosterone self test is a send-in sampling kit used to test for a suspected alteration in testosterone levels. The test is used to determine the concentration of the androgenic testosterone in saliva.

The process is painfree and can be done easily from home. The sample is analysed in the specialised diagnostics laboratory.

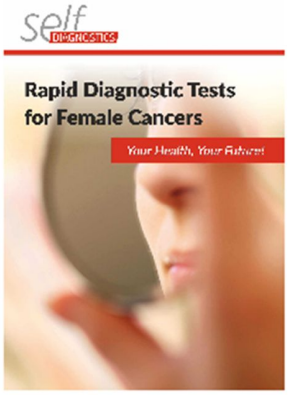
Our Products



Home Cancer Test kit for men

Why should you carry out the tests contained in the kit? The cells of adults grow, mature, divide and die. Cancer cells have no such mechanism proliferating freely and forming tumours. Hereafter, the cancer cells penetrate into the adjacent tissue, proliferate there and destroy this tissue. The consequences of the disease are very meaningful, and the load on the patient and his relatives is enormous. In spite of the progress in the medicine, cancer evolves still real fear. However, in case of timely recognition and in most cases, the cancer can be curable. Many types of the cancer can be nowadays fully cured. However, the course of the disease depends more on the type of the disease, its spread and patient's general condition. This test-kit "Cancer marker for men allows you to recognise the possible signs of the disease and (together with the doctor) to choose a targeted therapy.

Our Products



Rapid Diagnostic Tests for Female Cancers

The cells of adults grow, mature, divide and die. Cancer cells have no such mechanism proliferating freely and forming tumors. Hereafter, the cancer cells penetrate into the adjacent tissue, proliferate there and destroy this tissue. The consequences of the disease are very meaningful, and the load on the patient and his relatives is enormous. In spite of the progress in the medicine, cancer evolves still real fear. However, in case of timely recognition and in most cases, the cancer can be curable. Many types of cancer can be nowadays fully cured. However, the course of the disease depends more on the type of the disease, its spread and patient's general condition. This test-kit "Cancer marker for women "intime" allows you to recognize the possible signs of the disease and (together with the doctor) to choose a targeted therapy.

Zinc Sulphate Monohydrate Pellets	65%

NUTRACEUTICAL PELLETS IN COMBINATION

Name of the Product	Strength (W/W)
Each 1 gram of Blended Pellets contains	
Dried Ferrous Sulphate TR	
Equivalent to Elemental Iron	102.27mg
Folic Acid	11.36mg
Each 1 gram of Blended Pellets contains	
Dried Ferrous Sulphate TR	
Equivalent to Elemental Iron	95.7mg
Folic Acid	1.06mg
Zinc Sulphate TR	
Equivalent to elemental Zinc	47.9mg
Each 1 gram of Blended Pellets contains	
Carbonyl Iron	
Equivalent to elemental Iron	123.7mg
Folic Acid	1.03mg
Cyanocobalmine	30.93mcg
Ascorbic Acid	154.64mg
Zinc Sulphate	
Equivalent to elemental Zinc	46.4mg

NUTRACEUTICAL PELLETS IN COMBINATION

Name of the Product	Strength (W/W)
Each 1 gram of Blended Pellets contains	
Carbonyl Iron	
Equivalent to elemental Iron	153.84mg
Folic Acid	2.30mg
Vitamin C	115.38mg
Vitamin B12	7.69mg
Vitamin E Acetate	23.07IU
Selenium	123.07mcg
Zinc Sulphate	95.07mg
Equivalent to elemental Zinc	34.61mg
Each 1 gram of Blended Pellets contains	
Dried Ferrous Sulphate TR	
Equivalent to Elemental Iron	312.5mg
Folic Acid	1.04mg
Vitamin B12	31.25mcg
Zinc Sulphate TR	128.75mg
Equivalent to elemental Zinc	46.88mg
Each 1 gram of Blended Pellets contains	
Carbonyl Iron	
Equivalent to elemental Iron	158.73mg
Folic Acid	7.93mg
Methyl Cobalamine	317.46mcg
Glycine	39.68mg
Zinc Sulphate	39.68mg
Equivalent to elemental Zinc	13.35
Each 1 gram of Blended Pellets contains	
Vitamin B1	17mg
Vitamin B2	17mg
Vitamin B6	3.5mg
Vitamin B12	25mcg
Vitamin C	250mg
Folic Acid	1.75mg
Niacinamide	85mg
Calcium D Pentopthenate	21mg
Zinc Sulphate	91.55mg
Equivalent to elemental Zinc	33.3mg
Each 1 gram of Blended Pellets contains	
Vitamin B1,	4mg
Vitamin B2 ,	4mg
Vitamin B6 ,	2mg
Niacinamide	48mg

Partnership And Partners

Bravo Pharma offers various services for pharmaceutical and biopharmaceutical companies across the globe for collaborative business opportunities including formulation research & development, technology transfer, support to regulatory affairs, registrations, pre-clinical and clinical research and contract manufacturing.

International strategic partnerships are critically important for the success of business development. We are always open to form new long term collaborative relations with research institutions, knowledge-intensive SME-s, big pharmaceutical and biotechnology companies, medical institutions, private researches and medical doctors.

Please do not hesitate to contact us with your new ideas or proposal for future collaboration.

Establishment of the Reference Laboratory in Uzbekistan

Tillyashaykhov Mirzagaleb, President of National Cancer Center of Uzbekistan
with Mr. Rakesh Pandey,CMD, Bravopharma

In 2017 the Republic of Uzbekistan decided to enhance significantly applied cancer research and oncological treatment.
Within this framework a reference laboratory for comprehensive diagnostics in oncology is under establishment in collaboration with Bravo Pharma.

Mr. Rakesh Pandey

CMD, Founder, Member of the Board

In 2017 the Republic of Uzbekistan decided to enhance significantly applied cancer research and oncological treatment.
Within this framework a reference laboratory for comprehensive diagnostics in oncology is under establishment in collaboration with Bravo Pharma.

Mr. Rakesh Pandey has been involved in several World Bank projects and has consulted national governments for setting up new systems in diagnostics, healthcare and e-health.
He is supporting education in life sciences via scholarships, support to curricula development and training facilities.
He is a dedicated mentor to start-ups and innovative SMEs, contributing with his global network, personal experiences and orientation to success.
Mr. Rakesh Pandey is devoting a significant proportion of his time and resources to charity with emphasis on health, education and environmental issues.
